REAL INDUSTRY EXPERIENCE.

PRACTICAL SOLUTIONS.

CIVIL | WASTE | TRANSPORT | MATERIALS | AND BEYOND

EACSERVICES.COM.AU

EAC Services Pty Ltd provides practical consulting across civil works, construction, waste management, demolition, transport, logistics and material supply. Based in Double Bay, we support Sydney projects with planning, cost advice and delivery coordination.

Our capabilities

01 Civil works

Scope, staging, earthworks strategy, quantity take-offs, estimating and tender support.

02 Construction

Pre-construction planning, programming, cost reviews, site logistics and WHS documentation support.

03 Waste management

Classification guidance, testing coordination, waste plans, disposal and recycling options, and record support.

04 Demolition

Methodology and staging, contractor review, material recovery and coordination with licensed hazardous materials specialists.

05 Transport

Fleet and haulage reviews, route and access planning, and Chain of Responsibility and load management advice.

06 Logistics

Delivery scheduling, material flow, site storage planning, supplier coordination and cost-per-load modelling.

07 Material supply

Supplier selection, specification checks, quantity planning, pricing and recycled material alternatives.

Who we support

Contractors, builders, developers, project managers, asset owners, councils, transport and waste operators, quarries and material suppliers.

How we work

We clarify the brief, assess the requirements and provide practical recommendations. Engagements range from a focused review to ongoing support with your team, contractors and suppliers.

Why EAC Services

Hands-on industry experience informs advice that considers the whole project. We look at how scope, material movements, site access, costs and compliance requirements affect one another, so recommendations can be put to work.
